Furniture & More

Our Services

Designing

Designers at Inspiration use the latest design software to come up with the best and latest furniture and lighting models. They work along side a technical team to insure the ergonomics, comfort and functionality of the product. The team is lead by +35 years experienced consultants.

Manufacturing

All our products are customizable. We use the best types of wood, metal and materials to create products to get the best result. CNC and laser cutter are included in the manufacturing process. Fiberglass is one of the materials used in several products.

Our Services

Maintenance

We provide a special team for periodic maintenance that will keep the product in its best shape. We also revamping and repainting all products according to client's needs.

Delivery & Installation

In addition to manufacturing products, the company installs all products according to the plans and specifications.

Exporting & Shipping

We are reachable from anywhere in the world
as we export out products to any country.
As our products are unique and distinguished from all competitor, we export to many countries around the world.
